Breakout Group 1
AQS Conference
June 20, 2002

Multi-Voting Results

Regions 1, 2, 3 & 5

In browse you should be able to select by date along with site, monitor and POC.	16
Option of a text report (like Old AIRS).	14
An option for Quarterly Standard Report.	12
Batch edit Global changes in Correct.	12
Warning when all passwords are going to expire or grace log-in period.	11
Need to be able to mix hourly and daily data and all intervals in raw data retrievals.	11
Historic data shouldn't require new mandatory fields in edit or we need an "unknown" code.	9
Everything is slow (load, query and retrieve)	9

Cancel query button still sometimes exits you from systems.	9
Null data listed at the end of the raw data retrievals makes it impossible to integrate with the actual data points.	9
The ability for advanced printing options (double-sided or landscaping)	8
Make early Raw Data available.	8
Mechanisms for posting tips and solutions for all AQS users to access.	8
If we could E-mail to help Desk they might respond in a more timely manner.	7
Mike L. Data Histogram Report.	6
Mike L. PM2.5 Speciation Report.	6
Need consistency in spacing of data in reports. If a day is missing there should be a space.	6

We would like a no error message for the statistical evaluation report if there were no errors.	5
Set-up a format in either excel or COrrect to speed manual data entry.	5
Mike L. Network Review Report.	5
Mike L. Design Value Report.	4
Error message are cryptic.	4
Day of the week codes are not necessary.	4
Print preview for on-screen retrievals.	3
Online GEO Common File or data dictionary.	3
Cannot retrieve only exceptional event data.	3

Feedback mechanisms	2
Mike L. Exceptional Event Report.	2
Committee for improving/review of retrievals. (Retrieval Formats).	2
Quarterly Averages by CFR	2
Option to combine POCs for PM2.5 calculations at collocated sites.	2
More often than not, there is "No help associated with this item" when using the ? Button.	2
Edits, etc can only be run once per batch and are not stored anywhere, so you can not go back and check after load another batch.	2
Need batch load record count on the email so that we can tell if the right amount of records were loaded.	2
Live Chat with NCC.	1

Any message at bottom of screen needs to stay longer in query.	1
Can only submit one data range per report. Need to select multiples sites, parameters and dates.	1
Xerox very poorly due to shading.	1
Retrievals to the screen run very slowly.	1
Quick Look report for multiple sites does not have a page break between states. Cannot select by POC.	1
Tag Group for Met Standard (Gary)	0
People who cannot attend the conference have no voice in decision making.	0
Trouble certifying SLAMS report, data appears to be incorrect, makeup samples are not appearing.	0
When you expand the screen the view actually does not show more tabs. It only expands into gray space.	0

Data hand keyed in COrrect is in different order than the pipe delimited data.	0
COrrect data viewing needs to be sorted at least by site/parameter/date.	0
Scan converts units from submitted units to something else (standard units) for Met data making the user unable to check their raw data before posting.	0
P/A summary report does not display accuracy data.	0
Data Completeness needs to omit graphic space wasters and sort by site.	0
All retrievals, need to select by agency number not English name.	0
New AIRS forces the running of more reports due to selection restrictions.	0
Tons of blank pages on Quick Look report.	0
